## INTRODUCTION

Today's globalization, the growing conditions and complex geopolitical processes takes a multifaceted approach in professional training of military servants of security threats. Only modern military service, physical training, despite limited knowledge of combat skills or techniques, but the servicemen of psychological stability and emotional maturity shaxslararo also include the ability to manage relationships correctly. Especially, to realize the spiritual state of man, with the eyes of others to be sensitive to the feelings of others and the situation could get a price plays a special role in the environment as military skills. Rich servicemen from each military service and responsible management of their emotions activities during harsh situations to know to get them to behave in emergency situations, communicate effectively with team members will be required to enter into. Empatiya stands at the center of these processes. It is not only the ability to understand the other, but also collective decision-making position on valuation, changes in mental state and his companion in their own time to realize he allows you to show moral support when needed. Aksiologik approach,

according to the education process in the form of military all values are based on certain knowledge and skills. Among these values find expression in his professional career empatiya real person, which is recognized as an important psychological quality that gives you the motivation to practical action. Empatiya of advanced military servicemen in the community to create a healthy environment, and to follow the principles of mutual respect with the leading role in elimination of a conflict situation will carry out a constructive way. In addition, military empatiya also be a factor as strengthening the stability of the team is of great importance. In a team of individuals who have different character in operating conditions to understand the interaction of the military to provide psychological support and solidarity have become an integral part of the preparation. This quality increases the resistance of servicemen mental stress and helps to make correct and quick decisions in a situation provides the overall effectiveness of the team. The essence of the approach and the role of military education in Aksiologik Aksiologik the formation of the system approach the values of the person, his professional activity on the basis

of the relationship of spiritual and ethical criteria, allowing you to help you realize the pedagogical concept. According to this approach, not only the training of military servants, each the sum of knowledge and skills, but also a moral critique of the person, society and the human is determined by the position of responsibility in front of.

Performs tasks in the process of aksilogik the following strategic approach to military education:

1. Ethical-spiritual stability and the formation of military activity requires quick and accurate to make decisions in situations often harsh. In such circumstances, moral stability, emotional self-management on the status of, and other persons to a high level of income is important. Empatiya the psychological factors as central to this process: the experiences of others to feel and evaluate a team environment to adapt to constructive dialogue and the formation of stress serves to kompetensiya boshqarishkabi konflikt. As a result, servicemen to give emotions in difficult situations, traditional and responsible decision to make.

2. Social harmony in the military community to ensure the stability of the team Military mutual trust, respect and cooperation between network between hamnafas is based on his companion. Empatiya while this may strengthen unity is the psychological mechanism that, if each member of the team to realize their position, to act as the unified team and will help to support one another. Empatik a culture of healthy communication between the commander and servants the form of approach, avoids the social tensions within the community.

3. Create humane military service military service Aksilogik one of the main ideas of the approach is established with or without the combination of human values. These principles: human dignity and respecting the human rights to military discipline, in conjunction with the application of management principles to follow in the process of justice, the spiritual welfare of each approach includes ta'minlashkabi servant. Modern military management model based on humanitarian principles in counseling and is the foundation of such a model in the leading role — is empatiya. Small aksilogik form the basis of future servicemen empatiya (extended option) empatiya military education in the development process will rely on certain values. These values determines the professional and personal qualities of military servants in the future.

1. A sense of duty, patriotism and Patriotism of the military preparations of the most highly spiritual. Empatiya servants with the protection of the motherland is not only legal, but also social, spiritual meaning and the depth of human perception. It is considered as a task of ministering is the responsibility of the people quiet their services. Therefore, emotional, and spiritual aspects of addiction from the patriots empatiya turns out to be a strengthening factor.

2. Responsibility and discipline. Military discipline only if the command is not complete, but the content of the order, to understand that we learn to understand the general serves its purpose. Enhances mutual respect between ministers and the head of empatiya to realize. As a result, the mechanical basis of the order, but not consciously, responsibly carried out. This increases internal discipline and to the needs of professional culture will become.

3. Respect human life and dignity. One of the main principles of military activity — human life and dignity in conditions of any value. This psychological principle is the source of empatiya if indifferent to the life of other servants of the military will look the way does not put. Through this, the interests of the person that is in the form of military operations are a priority.

4. Team values. In many ways the success of the military service act in a case of the whole community depends on. Solidarity, mutual help, as is the natural result of the values yelkadosh empatiya. Empatik servants understand their place in the team, and will be ready to help others and contribute to improve the psychological climate of the group. Empatik the method of forming skills. Military officer empatiya future development of the psychological stability in the process of education, culture, communication and team work will serve to increase the effectiveness of shaxslararo. Empatik kompetensiya directed to the formation of the deep below, in the case extended the method are outlined.

1. Interactive methods. One of the most effective ways of teaching pedagogy in the modern military empatiya interactive sessions. Thus, the future of civil servants of various military-active access to psychological folding, their reaction will test conditions close to the real situation. The main interactive forms: role play: students commander, soldiers or into the role of ordinary citizens in various situations and will learn to show emotions to understand the position of others. Simulyasiya of complex situations:

combat stress, collective decision making, emergency situations, such as modeling artificial answer those instances was. Case study-stadi analysis: taken from real life military-psychological circumstances learn, their cause-effect analysis and human factors. "The other sheep instead of yourself" exercise: the students understanding of different roles by the situation to feel the experiences of others to teach. These methods empatiya cognitive (understanding) and affektiv (to feel) aspect of the shape together.

2. Psychological training aimed at developing special training in counseling military empatiya is widely used. They increases the sensitivity of the person in communication, emotional self-management skills will strengthen. Such training was mainly develop the following: Communicative kompetensiya: express the idea clearly, the choice of suitable communication strategy to the situation, the team manage the environment. Active listening: to listen without the friend, the feeling of his emotions, to interpret characters nonverbal. Emotional mind (feelings awareness): the person get to know their own feelings and the ability to get that distinguish boshqalarnikiga manage them. Without violence communication (NVC): requirements and challenge in a constructive way and express konflikt keskinlashmasdan of solution. This increases the emotional maturity of a military training environment, the strengthening of collective solidarity.

3. Reflektiv approach empatiya the formation of self-analysis is important to the process. Donald Schönning "is not allowed. practitioner," according to the idea of the reader will be able to regular revision of their activities by conscious behavior. Reflektiv approach main forms: military training or lessons after self-analysis: "what did you feel in this situation? I would answer back, so why?" questions like using empatiya will enhance. Written refleksiya of: personal experiences, it strengthens the emotional mind to describe the thoughts in writing. Group idea sharing: the ability of the evaluation to the same situation in a different context shape. Refleksiya the future of the military increases the sensitivity of the process to analyze the situation and teaches social and versatile.

4. Aksiologik content, conversations and lectures. To strengthen the spiritual values in education empatiya reference to military conversations of the person is also important. In this lesson the following topics will be covered: military ethics, norms, values the importance of

duty and responsibility, honesty, justice, conscience universal values such as military service of the humanitarian principles. Empatiya to strengthen the spiritual foundation of the conversations, the other person with respect to look to the interests of habit formation.

5. Joint projects and team assignments, team work is often based on the military training sessions. Servicemen from such assignments, support each other to carry out tasks without unity and the act requires. The most effective form of: Pair work: mutual trust and responsibility increases. Solve the problem in the group: get, considering the opinion of each member, you will develop skills of communication and maintaining literate. Collective decision making: position and come to a common solution teaches you how to listen to others. This method enhances internal solidarity and mutual respect among the members of the team.

6. The use of digital resources simulyatorlar Virtual, 3d models, interactive psychological tests that enhances the future of communicative skills in the military. Empatik scientific research skills in military activities Empatiya formation: overcome stress, to cooperation in extreme situations, disputes to mitigate basing of research rivojlantirishuchun given with leadership qualities. Psychology is recognized as a key element of the current military leader empatiya kompetensiya. Research empatiya fights of military preparations in place. Modern military professional military personnel conducted research in the field of psychology in the preparation of the strategic importance of basing empatiya of deep are given. In particular, the operating conditions of soldiers in empatiya hard to ensure emotional stability, self-management and development of the collective tasks kompetensiya is seen as one of the important factors in complete harmony. Empatiya studied in the scientific literature in the direction of a few of its role in military activities: overcoming stress in the process empatiya – research shows that military personnel have thought empatik high pressure situations in more effective implementation of control over own emotions, this is the consolidation of psychological resistance. Enhancing cooperation in extreme situations – Empatiya leads to the formation of mutual trust between team members. This quick decision-making, distribution of tasks, and will make each other more effective support mechanisms. To mitigate disputable situations, Military psychologists, in the opinion of the management empatik the perception of constructive conflict, the intensification of conflicts that would prevent it serves to provide a

healthy social climate in the community. The leader in kompetensiya empatiya – of-the-art not only to give the order from the head of the military, but the team encourage, motivation and assessment is required on your personal circumstances. Leader strictly as an integral part of empatiya therefore has a scientific basis.

Conclusion the formation of skills in future servicemen empatiya — modern military education is not only teaching, but also it is one of the most important directions of strategic and social importance. Aksiologik (values) in each kursant central methodological approach in this process and serve as the basis of the professional system that helps in the formation of insonparvarligi rely on the visions. Through this approach: human and national values, loyalty, duty to realize the essence of professional, solidarity and support team save, in any case, understand others, to show willingness to help, psychological stability and responsibility are not as consistent qualities are formed. Empatiya development of interactive lessons psixotreninglar, role games, vaziyatli assignments, reflektiv analysis, media training, as well as simulation of technology is recognized as an important method. By this means not only kursant emotional responsiveness but also analytical thinking, ability to make conscious decisions in complex social situations and the interaction of psychological and culture develops. So, empatiya-based education model is prepared only for military personnel specialists from the tactical aspects, but not having high moral principles, the team who feel the responsibility of society as a mature person who will understand the depth of their commitment in front of educate. This military system stability, the team has a direct role in ensuring the combination of internal and national security.
